>> **Mother Nature & Father God Have Spoken. Can You Hear Them Now?** <<

- Worsening weather is here to stay. Scientists predict that there’s no going back!
- The Bible has accurately predicted worsening world events before it is destroyed.
- Observance of the 7th day Sabbath or rest in voluntary obedience to God’s law has also been foretold to be a major factor in the final conflict between good and evil.
- All things will be made new when Jesus comes again and destroys all evil.
- Don’t be caught off-guard with false information. Choose hope’s side with all the facts.
- When the heat is on and the lights go out, sooth-sayings, smart attitudes, and smartphones won’t matter except making it to the better side of destiny.
- The 7th day is the birthday of our world. Attempts to change the weekly cycle only failed. Man operates by this and so does everything that has a unique code, DNA, or a law by which it is ruled.

Connect the dots. From the God Particle to God in particular.

1. On June 30, 2012, deadly heat enveloped the United States like never before. On July 4th, the “God Particle” was discovered in Europe. Well, the planet is in an environmental peril, what’s going on? Consider the following:

2. The United States was established on the rule of law and not on the rule of a monarchy. That all men are equal under the law as all have been created equal by the Creator as found in America's Declaration of Independence.

3. This therefore means that others, and by extension the world around us needs to be respected, loved, and cared for. This truth flows from the "love thy neighbor and your enemies" teaching of Jesus. There's a good chance that if you love others, you will be loved in turn! If we respect and care for the earth, it won't freak out as much, and we all stand to benefit. Man has been given dominion over the earth to care for it, and not trash it. But now, our planet is beyond repair. Man cannot save or extricate himself from the current self-predicament and a savior is desperately needed.

4. In light of the fact that the principle of "love" that underlies the rule of law continues to be violated and disregarded with respect to social, spiritual, and physical/environmental matters; and in as much as man has failed at the very least to take a weekly break by observing the 7th day Sabbath or rest as divinely prescribed and commanded for humanity’s own good and the good of the earth, the current worsening social & environmental consequences are the result and will only increase. This has been predicted by the Bible and the scientists as well.

5. Bible prophecy has very accurately predicted that the issue of Sabbath or rest, and consequently obedience to God and ALL His commandments of love will be a major factor in the closing events of earth’s history. The good news is that Jesus not only pre-planned and paid for our eternal salvation, but has given us grace to obey Him and be saved. Grace has not been given so that man can continue to live in disobedience to the rule of His laws!

6. While there is still time, you can still choose to be on the winning side by obedience through love for God, others and yourself. Damning, disregarding, or disobeying God and the rule of His laws will get us nowhere but chaos and ultimately back to Him to either be saved through grace and repentance, or face eternal destruction.

7. The "God Particle" in a way proves that there must be a God who is the singular source of all things and who cares to make all things right as He has promised. Choose now to be on hope's side! Call us and we will be glad to chat or visit with you to share the life changing truths of the Bible. Let’s journey home together. **Forward Hope!**
